### Do lasers dissolve fat?

#### Can lasers lift as well as tighten?

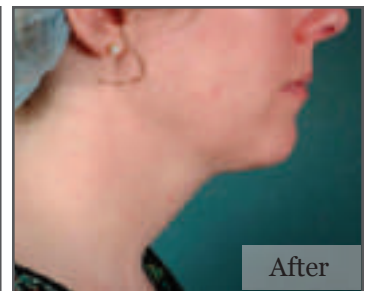

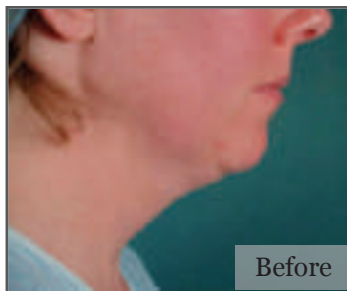

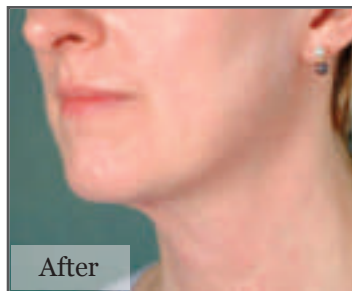

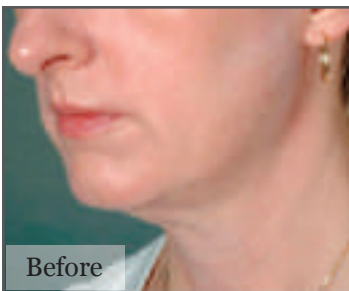

These questions were focus topics that I was asked to lead at the ASDS National Symposium in Fall of 2007. "The results you are about to see are as good as any surgical face lift results, and may be even better!" I stated as I introduced **Laser Lipolysis** at the national meeting in Chicago.

Laser Lipolysis is an exciting innovation that began here at Key Laser Institute. The combination of years of experience with traditional liposuction and our skills in laser medicine has produced a scientific synthesis of medicine and art.

The laser fibers, used painlessly beneath the skin, emit pulses of light that tighten the skin below. Unique to Key Laser Institute is not only our leading knowledge of how to use Laser Lipolysis to dissolve unwanted areas of fat excess, but our understanding of how to control lasers to lift and tighten with optimal results.

As a lead researcher for CoolTouch, Inc., it is exciting news that the FDA recently cleared the CoolLipo 1320 laser for laser-assisted lipolysis. This technology offers a light that is more highly absorbed by the skin's collagen and connective tissue, and tightens the skin from the inside out. What this means to Key Laser Institute patients is greater comfort, less recovery time, and impressive results.

## Light Lift™ with Fillers that Last Longer

Shadows that tend to fall upon our facial plains and under the eyes, subtle flattening of our cheeks or just the lines around our mouth—all seem to appear as we age.

Light Lift™, an important breakthrough in the use of soft tissue fillers, was developed at Key Laser Institute to address the shadows, subtle volume loss, and fine lines. Utilizing a method of better control for soft tissue filling, Light Lift™ uses ultra-small needles for a smoother, softer look resulting in less bruising and greater comfort.

Light Lift™ offers many choices in soft tissue fillers. Which would be the best

for you? Key Laser Institute can help you understand the best options for your individual needs. Here are some examples of soft tissue fillers used with Light Lift™:

**Juvéderm® Ultra Plus** is an injectable filler that is bio-identical to the natural monopolysaccharide matrix of the skin and may well last over one year.

**Sculptra®**, used as a deeper filler elicits your own collagen building response and may last years. This new dimension of soft tissue fillers is no longer just for your face. Pause, and take a look at your hands.

## Preparing Your Legs for Summer

While it may not be at the forefront of your mind as the temperature dips into the 30s, the time is now to begin preparing your legs for warmer weather. Spider veins, varicose veins, skin laxity, cellulite—these are all problem areas for many of us. What are the options available?

Read more on the Key Laser Institute website, and register to receive \$50 off your consultation. Don't hide your legs!

## Update Your Winter Skin Care Regimen

It is cold outside! If your skin is showing some winter weathering, you are not alone. Cold air and indoor heating can deplete your skin of water and oils. This leaves our skin barrier compromised, and in need of extra moisture and protection during these winter months.

We suggest using effective moisturizing products and gentle exfoliants to help your skin feel softer and healthier. And don't

forget your sunscreen to top it off! Damaging UVA and UVB rays do penetrate the cloudcover this time of year, and protecting your skin from photoaging is still very important.

If you would like product suggestions, or would like to schedule a personalized skin care consultation to update your skin care regimen, please contact Patient Services at 503-291-1953.

## Over 1100 Hours & Counting: Giving Back to the Community

Since April 2007, Key Laser Institute has offered tattoo removal services in exchange for community service hours. Our patients in this program have given back to the community over 1100 hours of volunteer time to a variety of non-profit organizations in our community. By joining together, our staff and patients are proud to be helping the larger community and those in need.

For more information on this special program, please call 503-291-1953.

## Patient Services Financing

With the many options available to Key Laser Institute patients, you can design the financing plan that suits your individual needs.

Not only can significant savings be realized through our service bundles, but we have little to no interest financing options available through CapitalOne Healthcare Finance and CareCredit.

For more information please contact our Patient Services Finance Administrator, ReNae Schwartz, at 503-296-4982 or [rschwartz@keylaserinstitute.com](mailto:rschwartz@keylaserinstitute.com).

ReNae Schwartz

This year I resolve to  
look as young on the outside  
as I feel on the inside.

Bringing science's light,  
experience's hands,  
and an artist's sensibility.

**Resolution: to improve myself**

- Shape my body with laser and ultrasound lipolysis
- Reveal my beautiful skin
